WMF 1400 CLASSIC

WELCOME WORLD OF COFFEE

The WMF 1400 has won over thousands of satisfied customers over the years. Its outstanding value for money, slimline construction, award-winning design and, last but not least, its reliability have all contributed towards its success. However, its consistent design for average coffee requirements – which doesn't compromise on comfort, beverage diversity or beverage quality – has made the WMF 1400 a global bestseller.

So it won't come as a surprise that we have decided to keep this coffee machine in our product range under the name WMF 1400 Classic. By making minor modifications to the design and features, as well as focusing on eight models, we are now able to offer you the WMF 1400 Classic at an even more attractive price. You can choose between models with a water tank or mains water connection, one or two grinders, chocolate or twin topping – all in all, a product range that leaves little to be desired.

03.1400.6100

Basic Milk, with water tank, 1 grinder, milk foamer, LED illumination, hot water, Basic Steam, 2.2 kW

03.1400.6110

Basic Milk, with fixed water, 1 grinder, milk foamer, LED illumination, hot water, Basic Steam and Plug+Clean, 2.2 kW

03.1400.6000

Basic Milk, with water tank, 1 grinder, milk foamer, choc, LED illumination, hot water, Basic Steam, 2.2 kW

Basic Milk, with fixed water and Plug+Clean, 2 grinders, milk foamer, choc, LED illumination, hot water, Basic Steam, 2.2 kW

The WMF 1400 Classic is available with these milk and steam systems.

Delicious Milk Choc and Chociatto

With plenty of fresh milk nearly any creation can be made from milk, coffee and chocolate.

The "hot rinse option"

Press this symbol to preheat all the parts in contact with the coffee. Hot espresso right from the very first cup and after extended waiting periods.

The "Barista symbol"

The next brew can be made stronger or weaker as the client desires by means of this symbol on the touch screen display.

Quality management

For espresso, after the initial extraction there is a preinfusion and postextraction; café crème, on the other hand, is brewed directly. Factors like these are stored in 5 quality levels, freely selectable for each coffee.

Plug+Clean

All milk-carrying parts are easily cleaned with the patented Plug+Clean.

Espresso

Well thought-out hopper

The hoppers can be locked before removal, to make cleaning and refilling very much easier.

Manual insert

On machines with 2 product hoppers, it is possible to use a third type of coffee (e.g., decaffeinated) via manual insert.

Clever key allocation

Key labelling is as simple as product allocation. Just print out and press on a new label.

Easily adjustable spout height

Containers with a ultimate height of 185 mm can be filled. For breakfast service or office use, it is also possible to dispense a jug of coffee.

Slim build

A WMF 1400 is only a little bit wider than the long side of an A4 page. So there's room for two even on the smallest counter.

Clear design

Elegant by day and a shining example of attractive design ideas by night.

The WMF 1400 was awarded the red dot award in one of the largest design competitions in the world.

Permanent descaling

A WMF water filter extends maintenance intervals, enhances taste and prolongs the service life of the machine.

ISO certifications

The WMF business division for coffee machines is certified in accordance with DIN 9001/quality management and DIN 14001/environmental management.

Environmentally friendly thanks to "Green WMF"

Reduced energy consumption, reduced use of chemicals, and almost 100 % recycling – these are just a few of the points in the sustainable WMF concept.

Service

A worldwide service network unique in the industry covering more than 80 countries ensures that you can always rely on your WMF coffee machine.
